

LUXPONT

STRATEGY & CAPITAL

CROSS BORDER CAPITAL ARCHITECTURE (CBCA)

01 / THE STARTING POINT

The efforts of a lifetime today rest on a single country.

And when the rules, the currency and legal certainty change, what took decades to build can be lost in just a few years.

The solution is not to take your wealth out of Mexico. It is for it to stop depending on a single place to sustain itself.

02 / THE ANSWER

Cross Border Capital Architecture (CBCA)

There is no need to move your assets in haste.

They need to be given an architecture:

An international, legal and documented structure that protects your wealth, keeps it at your disposal and lets it go on growing even as the rules change in your country.

It is what forward-looking business families already do. And it is the work of Luxpont.

03 / THE MANDATE

You do not assemble this piece by piece.

We design and establish your group's entire European structure and stand behind it from beginning to end: from the first line drawn to the bank account up and running.

We work this way because an architecture only protects when a single firm builds it in full and answers for whatever results.

You receive a structure that European banks recognise, that tax authorities respect and that you control — designed with our proprietary methodology, Cross Border Capital Architecture (CBCA):

The method that defines who truly controls your wealth, where each asset resides and how it endures across generations.

04 / PRESERVATION IN STERLING POUNDS

Once structured, your wealth can be safeguarded in pounds sterling in the United Kingdom, through two accounts that work together.

First, an investment account with access to a portfolio of investment-grade fixed income and selected equities, with a reference net return in the region of 10% per year. Then, a current account in sterling that lets you keep saving and draw on your capital whenever you need it.

Two products, one purpose: your wealth in a stable currency, earning and available, beyond the volatility of your home market.

05 / THE OUTCOME

The day the environment begins to shift again, you will not have to react.

Your wealth will already be outside, in order and in your hands, ready for whoever comes next.

06 / CONTACT

A FIRST CONVERSATION.

At Luxpont, every architecture is designed to measure — around your wealth, your family and your objectives — because a structure that does not fit your situation does not protect what it should.

These decisions are better made ahead of time than under pressure. A first conversation allows us to understand your situation and to assess, candidly, whether Luxpont is the right firm to accompany you.

Plaza de las Cortes, 5, P.5, Madrid, Spain.
