

LUXPONT

STRATEGY & CAPITAL

Corporate Dossier

2026

A lifetime's efforts now reside in a single country.

An international architecture so your wealth no
longer depends on one place.

What took decades to build can be lost in just a few years.

When rules, currency, and legal certainty change, everything changes—your business, your properties, your accounts.

The solution is not to move your wealth out of Mexico. It's to ensure it **no longer depends on a single place** to sustain itself.

Your assets don't need to move quickly. They need an architecture.

An international, legal, and documented structure that protects your wealth, keeps it at your disposal, and allows it to continue growing—even if the rules change in your country.

This is what forward-thinking business families do. This is Luxpont's work.

*Stop depending
on a single
place.*

You don't build this
piece by piece.

We design and establish your entire European group structure and take full responsibility for it—from the first draft to the operational account.

An architecture only protects when a single firm builds it entirely and stands by the results.

CROSS BORDER CAPITAL ARCHITECTURE™

Our method defines who truly controls your wealth, where each asset resides, and how it endures across generations.

You receive a structure that operates on three fronts.

Designed with our proprietary methodology, Cross Border Capital Architecture™, so each front stands on its own.

I

European banks recognize it

Accounts are opened seamlessly because the structure arrives fully documented.

II

Tax authorities respect it

Everything is legal and declarable. You sleep peacefully in Mexico and Europe.

III

You control it

Control remains where it should be: in your hands and those of your family.

COMPLEMENTARY SERVICES

Preservation in Pounds Sterling

Once the structure is in place, your wealth can be safeguarded in the United Kingdom through two accounts working in tandem:

An investment account (investment-grade fixed income and selected equities, with defined objectives based on your profile)

A current account in pounds sterling to access your capital when needed.

A stable currency, shielded from the volatility of your home market.

This service is detailed in the International Heritage Account in Pounds Dossier.

The day the environment shifts again, you won't
have to react.

Your wealth will already be abroad—organized, in your hands,
and ready for whoever comes next.

CROSS BORDER CAPITAL ARCHITECTURE™

A first conversation.

Every architecture is tailored to your wealth, your family, and your goals. These decisions are best made in advance, not under pressure.

A first conversation allows us to understand your situation and frankly tell you if Luxpont is the right firm to accompany you.
